# Product/Service Information

## Water Treatment Products and Programs

- **Cooling Water (Open and Closed):** Scale and Deposit Control Treatments, Corrosion Inhibitors, Microbiological Control Treatments, Closed System Treatments, Anti-Foulants, and System Cleaning Treatments
- **Boiler Water:** Scale and Deposit Control Treatments, Oxygen Scavengers, Hot Water Closed System Treatment, and Sludge Conditioning Treatments
- **Waste Water Treatment:** Flocculants, pH adjusters, Biocides, Defoamers, and Sludge digestion bacteria
- **Ultra-Pure Water:** Microbiocides, Scale Inhibitors and Dispersants, and Membrane cleaning formulations
- **Potable Water**
- **Fuel:** Combustion Aids and Fuel Oil Storage Additives
- **Ion Exchange Aids**
- **Equipment:** Instrumentation, Control and Chemical Feed Equipment, and Customer Testing Equipment
- **Laboratory Services:** Quantitative atomic absorption analysis, Infrared (IR) analysis, Microscopic metallurgical analysis, Corrosion coupon analysis, Water and deposit analysis, and Microbiological analysis.

## Paint Booth Maintenance & Janitorial Chemistry

- **Booth Coatings:**
  - Non-Water Soluble (Greases):** Lithium Based, Petroleum Based, Paraffin Based
  - Water Soluble:** Clear Tacky, White Tacky, Clear Dry, White Dry, White Grate Coatings
  - Water Based Peelable:** White, Clear
  - High Temperature:** Oven Tacky, Flash Tunnels
- **Booth Strippers:**
  - Low VOC:** Thick, Thin, Water Based, and Solvent Based
  - Medium VOC:** Thick; Designed for High Solids Paints
  - Medium/ High VOC:** Thick; Designed for 2K Paints
- **Cleaners:**
  - Paint Shop Floors:** Water Based, Solvent Based
  - General:** Water Based Degreasers, Tire Roller, Die Cleaners
- **Tack Cloth:** Used to clean dust and particulate from surface, comes in rolls and per-cut sheets
- **Robot Covers:** Can be fitted to any robot to protect from paint over-spray
- **Oven Products:** Cleaners to remove stains and condensate, Specially formulated coatings, and Strippers to remove the coatings
- **Janitorial Chemistry:** Facility floors, Bathrooms, Sanitary areas, etc.
- **Services:** Paint Booth Cleaning and Maintenance, Inventory control, and Testing services
- **Mask Wash Chemistry:** No foam formula

**Detackification Chemistry** - KML uses patented detackification technology to treat systems in which either solvent based or waterborne paints are sprayed.

- **Products:** Detack Chemistry, flocculants, defoamers, pH conditioners, biocides, filter bags, filtration equipment, and testing equipment
- **Services:** Design and construction of paint processing facility, Paint processing services, Equipment ordering, and Testing services

**Pulp and Paper** - KML's products and services include applications throughout the mill, including incoming water treatment, boiler and cooling water treatment, pulping, washing and bleaching, chemical recovery, papermaking, deinking, coating, and waste water treatment. Our products are specifically designed and manufactured for the paper industry to maximize benefits and cost performance while preventing production losses from deposits, imperfections, holes and breaks.

- **Products:** Microbiological control, stickies control, felt cleaners, scale and pitch control, retention aids, corrosion inhibition, clarification and sludge processing

## Floor Finishes

- **Epoxy:** Heavy Traffic, Chemical Resistant, Various Colors
- **Epoxy ESD & Conductive:** KML's ESD epoxy finishes specifically target the Electro-Static Discharge Association's principals for environmental control, establishing electrostatic protected areas, and dissipating and neutralizing the static charge.
- **Acrylic:** Concrete Sealers, High Gloss/Burnishable.
- **Oil Modified:** Heavy Traffic, High Gloss.
- **Urethane:** Chemical Resistance, U.V. Resistant.
