

BWT-212

STEAM BOILER TREATMENT

DESCRIPTION:

BWT-212 is a complete boiler water treatment incorporating polymeric sludge conditioners, an oxygen scavenger and alkalinity builders. BWT-212 provides excellent scale and corrosion inhibition in boilers where the make-up water contains a relatively high amount of hardness.

GENERAL APPLICATIONS:

Dosages will vary depending upon the temperature, alkalinity and hardness of the boiler feedwater. For optimum results, the recommendations of your KML Technical Representative should be followed.

SAFETY & HANDLING:

Improper handling of this product can be injurious to workers. Observe all safety precautions shown on the label and in the Material Safety Data Sheet. Wear proper protective equipment listed on the MSDS. Follow the instructions of your KML Representative in the proper use of this product.

ADVANTAGES:

- Provides excellent scale inhibition, ensuring maximum heat transfer efficiency
- Provides both general and oxygen corrosion inhibition
- Low, economical dosages

Typical Product Characteristics

AppearanceLight yellow liquid
Density at 25°C1.20 - 1.23 g/ml
Weight per US gallon10.1 lbs./gal
pH of product> 12.5

PACKAGING:

BWT-212 is available in non-returnable, DOT approved, 55, 30 and 15-gallon plastic drums and 5-gallon plastic pails.
