

Defoamer DFX 596

PAINT & WASHER DEFOAMER

DESCRIPTION:

DFX 596 consists of a single, highly effective defoamer for use in Paint Booth Detackification Operations. DFX 596 effectively modifies the surface tension of the booth water to significantly reduce or eliminate foaming. This product is compatible with most organic paint detackification programs.

USE INSTRUCTIONS:

DFX 596 may be applied as received with an automated chemical feed system or it may be added in slug doses as needed to control foaming. DFX 596 may be metered into the system using a direct proportional electronic chemical pump or through the use of a water induced shearing pump. Your KML representative can recommend the best-feed points for the application of DFX 596.

ADVANTAGES:

- Single component product
- Contains no harsh solvents
- Immediately dissipates entrapped air in booth water

- Highly concentrated, water soluble
- Compatible with most organic treatment programs

Typical Product Characteristics

AppearanceClear, Yellow Liquid
SolubilityComplete in water
Specific Gravity0.84
Flash Point275°F

SAFETY AND HANDLING:

Improper handling of this product can be injurious to workers. Observe all safety precautions shown on the label and Material Safety Data Sheets. Wear proper protective equipment listed on the MSDS. Follow the instructions of your KML Representative in the proper use of this product.
