

Machine Parts Cleaner PS 400

PAINT EQUIPMENT SOLVENT CLEANER

DESCRIPTION:

PS 400 is a high flash point solvent cleaner designed for cleaning paint equipment with much less danger of fire due to the high flash point. The solvents in PS 400 also present a reduced health risk to workers.

GENERAL USE INSTRUCTIONS: PAINT HOSES, GUNS, HARDWARE:

Place hoses, guns and hardware in a container of PS 400 for 10 to 20 minutes, remove and wipe clean with a cloth.

AUTO. SPRAY EQUIPMENT:

PS 400 can be sprayed on the equipment using a low-pressure pump. Areas with a heavy build-up will require some wiping with a solvent soaked cloth.

MISC. EQUIPMENT OF PARTS:

Place miscellaneous equipment or parts in a tub equipped with a cover. Parts may be allowed to sit overnight. PS 400 may be re-used in these applications.

BOOTH WALLS AND FLOORS:

Use PS 400 direct from the drum. Spray the areas to be cleaned in a one-step clean and wash. Areas with excessive build-up will require some scrubbing and re-spraying. Use either a Binks or Graco Pump equipped with a regulator, high-pressure hose and airless spray gun.

ADVANTAGES:

- Effectively removes most paints
- Rapid flash off
- No residue left on equipment
- High flash point (135°F) reduces fire risk
- Compatible with paint detackification

Typical Product Characteristics

Appearance	Clear to Hazy
Odor	Solvent
Solids	32%
pH (5% in water)	10.0
Packaging	55 Gallon Drum

SAFETY AND HANDLING:

Improper handling of this product can be injurious to workers. Observe all safety precautions shown on the label and Material Safety Data Sheets. Wear proper protective equipment listed on the MSDS. Follow the instructions of your KML Representative in the proper use of this product.
