

KML

Paint Booth & Janitorial Technologies

KML's fundamental goal is to lower your operating costs while increasing your level of service, reporting and accountability.

- ✓ All of KML maintenance products can be altered to fit any unique need.
- ✓ MSDS and Product Specification sheets are available for additional information.
- ✓ KML can supply your total maintenance needs.

Are you spending a lot of time and money maintaining your paint and production areas, only to be losing the battle with dirt, paint over-spray and lost efficiency? KML can help your facility fight back and save money with a proven array of coatings, cleaners, and protective finishes.

Booth Coatings - Greases: Our greases run from standard booth and baffle coats to products that are wax based to resist being sprayed off by hand painters, and grease containing white pigmentation for maximum cosmetic appearance. *Peel-coats:* We offer sprayable and rollable peel-coats.

Non-Water Soluble: Lithium Based, Petroleum Based, & Paraffin Based

Water Soluble: Clear Tacky, White Tacky, Clear Dry, & White Dry

Water Based Peelable: White & Clear

High Temperature: Oven Tacky & Flash Tunnels

Booth Strippers - Products include a range of strippers varying in VOC load.

Low VOC: Thick, Thin, Water Based, & Solvent Based

Medium VOC: Thick; Designed for High Solids Paints

Medium/High VOC: Thick; Designed for 2K Paints

Cleaners - Specialty products include rubber removers for tire rollers. KML offers a range of paint stain removers varying in VOC load.

Paint Shop Floors: Water Based, Solvent Based

General: Water Based Degreasers, Tire Roller, & Die Cleaners

Oven Products - We have cleaners to remove stains and condensate, specially formulated coatings, and finally strippers to remove the coatings. These products have both high pH and neutral pH versions.

Janitorial Chemistry - We have cleaners for facility floors, bathrooms, sanitary areas, etc. as well as products to help protect and emphasize an areas appearance.

Floor Finishes - KML offers a variety of Acrylic, Urethane and Epoxy floor coatings and finishes.

Acrylic: Concrete Sealers, High Gloss/Burnishable.

Oil Modified: Heavy Traffic, High Gloss.

Urethane: Chemical Resistance, U.V. Resistant.

Epoxy: Heavy Traffic, Non-Skid, & ESD
