

Vola Mene 9

STEAM LINE TREATMENT

DESCRIPTION:

Vola Mene 9 is a steam line treatment used to control corrosion in steam and condensate lines. Vola Mene 9 delivers both the neutralizing advantages of a volatile amine and the barrier inhibition properties provided by a filming amine type ingredient to provide wide range corrosion inhibition.

GENERAL APPLICATIONS:

Dosages will vary depending upon the alkalinity of the boiler feedwater. For optimum results, the recommendations of your KML Technical Representative should be followed.

SAFETY & HANDLING:

Improper handling of this product can be injurious to workers. Observe all safety precautions shown on the label and in the Material Safety Data Sheet. Wear proper protective equipment listed on the MSDS. Follow the instructions of your KML Representative in the proper use of this product

ADVANTAGES:

- Provides excellent condensate system corrosion inhibition
- Combination of filming and neutralizing actions provides greater coverage than single or combination amine treatments

Typical Product Characteristics

AppearanceLight, yellow liquid
Density at 25°C0.82 - 0.84 g/ml
Weight per US gallon7.0 lbs./gal
pH of product9 - 11

PACKAGING:

Vola Mene 9 is available in non-returnable, DOT approved 55, 30, and 15-gallon plastic drums and 5-gallon pail.
